PRODUCT PREVIEW

Understand it. Use it.

MAKE TECHNOLOGY EASIER

A new television, washing machine or phone should not mean an evening lost in instructions. Pia is being developed to help you work through the steps.

Start with the right device

Share the model, the instruction or the screen you are looking at. Confirm that the guidance matches your equipment.

Get a practical explanation

Ask for setup help, a plain-language explanation or a shorter sequence of steps. Learn what the controls actually do.

Connect supported services

Use official routes for compatible devices, mail, calendars, files and other supported services. Choose the permissions each connection needs.

Troubleshoot with a purpose

Explain what happened, try appropriate checks and know when to stop and contact the manufacturer or a qualified technician.

- “Show me how to connect this television and use the features I actually need.”
