PRODUCT PREVIEW

When the answer deserves a closer look

ASK THE BOFFINS

A claim sounds convincing. Two options look similar. A decision matters enough to investigate properly. Ask the Boffins starts by clarifying what you need to find out.

A focused research check

Examine a bounded question, claim, option or source and identify what the evidence can support.

A fuller research project

Agree a question, scope, sources, deliverable and limits. Bring findings, contradictions and practical implications into a coherent result.

Evidence you can inspect

See the sources behind important findings, the uncertainties and the difference between fact and interpretation.

- “Compare these approaches for our circumstances. Explain the trade-offs and what we still need to verify.”

DEVELOPMENT STATUS

Ask the Boffins is a standalone AI research platform in development. Contact American AI to discuss your question, scope, budget and the available route for the work.

PRODUCT PREVIEW

One project. One coherent result.

ASK THE BOFFINS

Ask the Boffins is American AI's independent research platform, designed around a clear brief, inspectable evidence and a useful report.

Agree before proceeding

Define the work and proposal before the research commitment. A visible invitation is not unlimited included research.

Keep different views connected

Test competing interpretations against the same project evidence. Track relevant changes rather than collecting disconnected answers.

Use the result thoughtfully

Review conclusions, limitations and recommendations. Professional decisions may still require a qualified adviser or primary verification.

SCOPE AND EVIDENCE

Agree the scope, deliverable and terms before starting. Research can reveal uncertainty or insufficient evidence. Professional decisions may still require qualified advice.
