PRODUCT PREVIEW

Understand the design

SAFETY, RELIABILITY AND DEVELOPMENT

For a closer look at the thinking behind the products, start with these public explanations.

D01 Development Horizons

Research directions, practical purpose and how useful learning can be preserved as projects change.

T01 Protection Architecture

The intended separation of assistance, review, permission checks, containment and human control.

T02 Continuity and Reliable Work

Requirements for preserving work, checking uncertain outcomes and recovering without repeating actions.

How to use this collection

Start with a short introduction, then choose the topic that matters to you. Read the availability notes and ask about the exact capability, terms or evidence relevant to your enquiry.

Talk to American AI >

A DESIGN EXPLANATION IS NOT A TEST RESULT

The technical brochures describe responsibilities and requirements. Implementation and operating evidence must be checked for the particular service; no safeguard guarantees a perfect outcome.

PRODUCT PREVIEW

MEET PIA

YOUR PERSONAL INTELLIGENT ASSISTANT

Tell Pia the outcome you want.

Pia is being developed to help organise everyday life: communications, meetings, travel, plans and technology, with you in control.

ORGANISE

Bring meetings, appointments, reminders and plans together so the next step is clear.

COMMUNICATE

Prepare emails and, through supported connections, send authorised messages or make authorised calls.

PLAN & BOOK

Plan travel, compare stays, organise a gathering and use supported booking routes when available and authorised.

MAKE TECHNOLOGY EASIER

Turn the screens, instructions and documents you choose to share into clearer, usable next steps.

YOU STAY IN CONTROL

In development. Drafting is not sending; planning is not purchasing. Connected actions require your permission and supported functions.

Explore Pia at American AI >

PRODUCT PREVIEW

MEET PIA

YOUR PERSONAL INTELLIGENT ASSISTANT

Tell Pia the outcome you want.

A journey to arrange. People to bring together. A task you have been putting off. Pia is designed to help carry the practical work forward, while you remain in control.

Organise

Bring meetings, appointments, reminders and plans together so the next step is clear.

Communicate

Prepare emails and, through supported connections, send authorised messages or make authorised calls.

Plan and book

Plan travel, compare stays, organise a gathering and use supported booking routes when available and authorised.

Make technology easier

Turn the screens, apps, instructions and documents you choose to share into practical next steps.

DEVELOPMENT STATUS

PIA is in development. This brochure describes the intended experience. Availability, supported connections and charges will be confirmed for each released service.

PRODUCT PREVIEW

An evening together

ONE REQUEST. A PLAN YOU CAN FOLLOW.

“Pia, help me organise dinner with everyone next Friday.”

This illustrative journey shows how the personal-assistant design connects a plan with the practical tasks behind it.

1 Bring the plan together

Work through the people, timing, budget and preferences. With authorised calendar access, Pia can help check commitments and shape a suitable plan.

2 Handle the organising

Prepare invitations and questions for the venue. Sending, calling and making a booking depend on supported connections and your permission.

3 Keep the details together

Keep the agreed arrangements, confirmations and useful details with the plan. Calendar updates require the relevant connection and permission.

The same pattern can help with a working day: prepare an agenda, organise documents and arrange a meeting. What has been drafted, requested and confirmed should remain clear.

YOUR PERMISSION REMAINS THE BOUNDARY

Drafting is not sending; planning is not purchasing. Pia must verify the result before describing an action as completed. This is a design example, not a completed customer booking.

PRODUCT PREVIEW

More of your life

TRAVEL, IDEAS AND EVERYDAY TECHNOLOGY

Practical help, built around the things you want to do.

Travel

Compare flights and stays, shape an itinerary around your interests and budget, and keep plans and confirmations in a Trip File. Supported bookings require your approval.

Communications

Turn a spoken thought into an email. Prepare questions for a hotel or supplier, arrange meetings and organise follow-up. Sending and calls require supported services.

Technology

Explain a confusing screen or provide instructions. Work through an app, device setup or troubleshooting without having to interpret every detail alone.

Projects and occasions

Plan a celebration, develop a project or shape creative work such as an invitation, image or film. Keep the choices, files and next steps together.

Learning and research

Practise a language, prepare for an interview, investigate a question or compare a purchase. Ask for explanations and the reasons behind your options.

Continuity

Return to the plans, preferences and records you choose to retain. The design includes reviewing and correcting the context used to help you.

CHECK THE SUPPORT AVAILABLE FOR YOUR TASK

These are documented capabilities and design directions. Individual functions depend on the relevant service, permissions and release scope; this brochure is not proof that every connection is live.

PRODUCT PREVIEW

You stay in control

USEFUL HELP. CLEAR PERMISSION.

You should not have to become an expert in every app or service to get something done.

Choose what Pia may use

Decide which information to share and which actions to authorise. Sending, spending and sharing remain subject to your instructions and the supported service.

Keep useful context

Retain the preferences, plans and records you choose. Review and correction are part of the documented experience; exact account controls need confirmation in the released service.

Ask for a second look

PIA Protect is designed to explain concerns in uncertain or suspicious material. It does not promise to identify every risk or guarantee a safe outcome.

An advertising-free direction

Useful assistance and customer control remain central. Applicable commercial relationships must be explained at the relevant point.

Choose one task: a journey, a meeting, a project or a piece of technology you want to understand. Consider what you would like Pia to prepare and what you would want to approve yourself.

PRODUCT PREVIEW

More room for your life

YOUR PIA PORTFOLIO

Tell Pia the outcome you want. Pia is being developed to organise details, help you communicate, make plans and carry authorised work forward.

Organise the everyday

Bring appointments, reminders, documents and unfinished plans together. See what needs your attention and return to work you have already started.

Communicate with confidence

Turn spoken thoughts into an email, message or meeting brief. Where supported, Pia is designed to help prepare and carry out communications you authorise.

Make plans happen

Shape a journey, compare options, coordinate a gathering or organise a project. Keep the plan, decisions and next actions together.

Make technology easier

Show Pia the instruction, screen or device you are dealing with. Get a practical explanation and help with supported setup and troubleshooting.

- “Arrange a meeting next week, prepare the background and help me plan the trip.” Pia connects the pieces while keeping important choices with you.

Everyday Pia >

DEVELOPMENT STATUS

Pia is in development. This brochure describes the intended experience. Availability, supported connections and charges will be confirmed for each released service.

PRODUCT PREVIEW

Choose the help you need

YOUR PIA PORTFOLIO

The portfolio follows real situations: a journey to plan, a question to investigate, a business to organise or something you want to create.

Life and work

The intended everyday experience connects practical help with work, learning, language, shopping and chosen records. Travel and project planning can grow from the same conversation.

Japan with Fumi

Fumi brings practical Japan help to transport, menus, stays, outings, useful Japanese and cultural understanding.

Office and Premium

Office is designed for defined business work. Premium provides a deeper private environment for personal and professional coordination. Each service has its own information and permission boundaries.

Research, learning and creativity

Ask the Boffins investigates a defined question. Learn with Pia develops understanding through practice. Creative Studios help turn ideas into images, stories and movies.

PRODUCT PREVIEW

Assistance with you in control

YOUR PIA PORTFOLIO

A useful assistant understands the difference between preparing a good option and committing you to it.

Permission comes first

Choose which accounts and information Pia may use. Sending, booking, spending and publishing follow the relevant permissions and confirmations.

Information you can revisit

Keep selected plans and records, correct what is wrong and decide what may be shared. Personal and business contexts do not merge simply because the same person uses them.

A second look when it matters

PIA Protect helps examine suspicious material and outgoing information. Pia explains uncertainty and helps you decide what to verify independently.

Your attention belongs to you

The product direction is advertising-free. Recommendations should serve your task; any commercial relationship relevant to a transaction should be clear.

Explore Pia Protect > **How PACE works >** **Privacy and control >**

YOUR PERMISSION COMES FIRST

Check current availability, supported connections and privacy controls before use. Ask Pia to explain a proposed action before giving the relevant approval.

PRODUCT PREVIEW

Start with what matters today

EVERYDAY PIA / ACCESS

A letter to understand. A trip taking shape. A conversation to prepare. Access is being developed as a familiar place to ask, organise and continue.

Turn information into next steps

Explain a document, compare a product, prepare a response or work through instructions in plain language.

Keep the useful things together

Save chosen records in Vault, return to a plan and see the tasks waiting for your attention.

Learn and create

Practise a language, prepare for work, develop an image or draft something you want to say.

Put your presence online

Create and update a supported website with your words, images and chosen information. Review changes before publication.

- “Help me prepare for my interview, tidy my CV and keep the questions I want to practise.”

DEVELOPMENT STATUS

Access is being developed as an everyday Pia experience. Available functions, supported connections and charges will be explained with the released service. Tell us what you would like help with.

PRODUCT PREVIEW

Travel with Pia

TRAVEL DIRECTOR CONCEPT

One place to understand the whole trip, from the first idea to the confirmation you can find again.

AN IDEA IS NOT A BOOKING.

CONSIDERING › SELECTED › PLANNED › RESERVED › CONFIRMED

Illustrative trip states. Moving between them needs an explicit decision and the relevant evidence.

Keep the whole trip together

The proposed Trip File brings plans, flights, stays, research, documents, costs and next actions into one organised view. Each item should keep its real status.

Make progress without losing the facts

Save a possibility without turning it into a reservation. Keep a preference separate from a plan, and keep a booking record separate from its payment status.

DEVELOPMENT CONCEPT

Travel Director development is on hold. This brochure explains the proposed design; it is not a service currently available to the public.

PRODUCT PREVIEW

Know what each step means

A CLEAR ACCOUNT OF THE TRIP

A trip can contain ideas, chosen options and actual reservations at the same time. Their labels should make that difference easy to see.

Considering	An option worth exploring. Nothing has been chosen.
Selected	A preferred option, still separate from the accepted trip plan.
Planned	Included in the trip plan. This alone does not mean it is booked.
Reserved	Recorded as reserved, with final confirmation still to be resolved.
Confirmed	Confirmation evidence has been accepted into the Trip File.

Confirmation and payment are different questions.

A confirmed reservation may still be unpaid or payable at the property. The design keeps payment status separate, including deposits, refunds and unknown amounts.

EVIDENCE BEFORE ASSUMPTION

A label in a trip organiser does not create a supplier booking or prove payment. Check the actual confirmation, terms and current details with the provider.

PRODUCT PREVIEW

From research to a usable plan

KEEP THE THREAD OF THE JOURNEY

Useful travel help should preserve the research, show what has changed and leave you in control of the next decision.

Save useful research

Keep promising options and their sources with the trip, so a good lead does not disappear into a forgotten browser tab or message.

Review before adding a booking

The proposed Booking Review separates information being examined from a record accepted into the trip. Unclear details should stay visible.

Keep private material appropriately protected

Travel documents and personal details need suitable access controls, clear permission and tested handling. A design promise is not evidence that a control is working.

Explore American AI >

Planning Japan now? Start with the free Fumi guides >

AVAILABILITY

No public launch date or live booking connection is promised here. Free Japan guides are available separately at FumiTours.com; the Fumi AI companion remains in development.

PRODUCT PREVIEW

Keep the whole job in view

PROJECTS WITH PIA

A house move, family celebration, renovation or community project can involve many decisions. Pia is being developed to help give the work a clear shape.

Define the outcome

Capture what success looks like, what is included and what must stay outside the project.

Make the plan practical

Break work into tasks, milestones, costs and dependencies. Identify the people and decisions each step needs.

Keep decisions connected

Bring chosen documents, quotes, notes and approvals into the project record. See why a plan changed.

Follow through

Review progress, recognise a delay and revise the next step. A task is not complete merely because it was discussed.

- “Help us organise the move, compare the quotes and work out what must happen before moving day.”

Explore Pia > **Inside Pia >** **Ask the Boffins >**

DEVELOPMENT STATUS

Project assistance is in development. Start with the outcome, deadline and people involved. Check supported functions before use and consult qualified professionals for specialist decisions.

PRODUCT PREVIEW

Bring people together

MAKE AN OCCASION OF IT

A birthday, dinner, work gathering or family evening begins with the people and atmosphere you want. Pia is being developed to help the pieces fit.

Set the scene

Shape the occasion, guest needs, timing and practical arrangements. Keep a simple running order.

Give it a personal touch

Prepare invitations, introductions, a speech, images or a family video with the appropriate permissions.

Find the right sound

Explore music, playlists and karaoke through supported services, accounts and devices.

Make the technology behave

Prepare the supported screen, speaker or playback route before the moment arrives. Keep an alternative if a connection fails.

- “A relaxed family birthday: a short speech, familiar music and a few favourite photos.”

Creative possibilities > **Technology assistance >** **Projects with Pia >**

DEVELOPMENT STATUS

Occasion-planning assistance is in development. Tell us who is coming and how you want it to feel. Media functions will depend on supported services and the rights for your use.

PRODUCT PREVIEW

Give your idea a form

CREATE WITH PIA

Describe the picture, story or moment you have in mind. Pia's creative tools are being developed to help turn an idea into a draft you can review.

Image Studio

Create and refine still images: an invitation, a website image, a portrait treatment or a visual idea. Explain what to change in ordinary language.

Movie Studio

Build a short film from a story, scenes, images, clips, narration and music. Review the pieces and the assembled result.

Story Studio

Develop characters, settings and a shared family story. Keep choices and versions together as the story grows.

- “Turn our holiday memories into a short story and a film we can share with the family.”

Occasions with Pia >

Inside Pia >

DEVELOPMENT STATUS

Creative tools are in development. Available image, film and story functions, supported connections and charges will be explained with each released service.

PRODUCT PREVIEW

Make it yours, thoughtfully

CREATE WITH PIA

Good creative work combines imagination with clear choices about people, ownership and publication.

Keep control of the draft

Try alternatives, review versions and select the one that expresses your intention.

Respect the people in it

Obtain the necessary permission for faces, voices and private material. Be clear when a scene is imagined or an image has been materially altered.

Choose what to share

Check the finished work, intended audience and rights before publishing or sending. Creating a file does not authorise public use.

Voice and dictation > **Privacy and control >** **Explore Pia Protect >**

KEEP THE FINAL CHOICE

Choose the audience, purpose and source material you have permission to use. Review the finished work before sharing; creating a draft does not authorise publication.

PRODUCT PREVIEW

Understand it. Use it.

MAKE TECHNOLOGY EASIER

A new television, washing machine or phone should not mean an evening lost in instructions. Pia is being developed to help you work through the steps.

Start with the right device

Share the model, the instruction or the screen you are looking at. Confirm that the guidance matches your equipment.

Get a practical explanation

Ask for setup help, a plain-language explanation or a shorter sequence of steps. Learn what the controls actually do.

Connect supported services

Use official routes for compatible devices, mail, calendars, files and other supported services. Choose the permissions each connection needs.

Troubleshoot with a purpose

Explain what happened, try appropriate checks and know when to stop and contact the manufacturer or a qualified technician.

- “Show me how to connect this television and use the features I actually need.”

Inside Pia >

Learning with Pia >

DEVELOPMENT STATUS

Technology assistance is in development. Check device compatibility and permissions before use. Have the model and instructions ready. Never bypass electrical, vehicle or other safety controls.

PRODUCT PREVIEW

From a document to an answer

SHOW PIA. KEEP WHAT MATTERS.

Pia is being developed to help explain a chosen photo, screenshot or file, and to keep useful records through the capture and storage tools you choose.

Capture deliberately

Share the instruction, letter, receipt or travel confirmation you want help with. Choose what Pia may see.

Understand and correct

Review extracted details, ask about unfamiliar wording and correct a mistaken date, amount or name.

Save with a purpose

Keep the original and useful context in an appropriate place. A quick question does not need to become permanent memory.

Find it when it matters

Return to the hotel inclusion, purchase record, manual or project document without reconstructing the whole story.

- “What does this hotel confirmation include, and what should I check before arriving?”

Privacy and control >

Explore Pia >

DEVELOPMENT STATUS

Capture and saved-record tools are in development. Review extracted details before relying on them. Storage, retention and sharing controls will be explained with the released service.

PRODUCT PREVIEW

Speak the thought. Shape the message.

SAY IT YOUR WAY

Pia is being developed to turn what you mean into words that suit the person, purpose and occasion.

Get the idea down

Speak naturally. Turn notes into an email, message, letter, memo, speech or useful document draft.

Find the right tone

Make it clearer, warmer, shorter or more formal while keeping your intended meaning.

Organise the conversation

Prepare an agenda, invitations, questions and follow-up notes. Use supported calendars and communication connections.

Review before action

Check the recipient, account, attachments and content. Sending messages or making calls will depend on supported connections and your authorisation.

- “Invite the team to discuss the launch, suggest two times and include the short background note.”

Privacy and control >

Explore Pia Protect >

DEVELOPMENT STATUS

Voice and communication tools are in development. Available functions, supported connections and charges will be explained with each service. Review the intended action before authorising it.

PRODUCT PREVIEW

Useful context, chosen by you

YOUR INFORMATION. YOUR DECISIONS.

Pia is being designed around information you choose to provide, with clear choices about what is remembered and shared for a task.

Memory you can understand

Review selected preferences and saved context. Correct mistakes and choose what should stop being used.

Private and shared stay distinct

Family, advisers, Office colleagues and public visitors have different information needs. Participation in one task does not grant access to everything.

Connect only what is needed

Choose supported accounts and permissions for the task. Review or revoke access when the relationship changes.

- “Use these travel preferences, but do not share my private notes with the rest of the group.”

Memory and records >

Explore Premium >

DEVELOPMENT STATUS

Memory and privacy controls are in development. Available settings, retention rules and provider disclosures will be explained with each service. Check them before sharing sensitive material.

PRODUCT PREVIEW

Preparation is not permission

YOUR INFORMATION. YOUR DECISIONS.

A draft, recommendation or possible booking gives you something to consider. Consequential action still needs the right authority.

Know what you are approving

See the intended action, destination, important terms and any cost before committing.

Set a clear boundary

Limit a task by purpose, account, recipient or scope. Pause work or withdraw permission where supported.

Know what happened

Check whether work was prepared, sent, confirmed or failed. Ask for the result and the relevant recovery or correction options.

Explore Pia Protect > **How PACE works >** **Voice and dictation >**

BEFORE YOU AUTHORISE AN ACTION

Check the exact recipient, account, action and any cost before sending, booking, paying or publishing. Available deletion and export controls, and their limits, will be explained for each service.

PRODUCT PREVIEW

Warmth with a steady centre

A PIA YOU CAN UNDERSTAND

Pia's character is intended to make assistance clear, honest and comfortable. Personalisation should help her understand you without changing the underlying commitment to integrity.

Be honest about the answer

Distinguish knowledge, uncertainty and a suggestion. Correct a mistake rather than defend it.

Be honest about the work

Explain what has been prepared, what has happened and what still needs attention.

Respect your choices

Adapt language, tone and presentation. Keep your decisions and personal boundaries central.

Keep the relationship healthy

Offer practical support without using fear, affection or dependence to pressure a decision.

Pia and her principles >

Explore Open Conscience >

DEVELOPMENT STATUS

Pia's character and Open Conscience remain in development. The design separates personal style from human-governed principles. Customer preferences do not grant new permissions or override those principles.

PRODUCT PREVIEW

Begin where you are

MAKE A LITTLE MORE ROOM

Pia is being developed to help you organise your thoughts, choose a manageable next step and return to your own practical goals.

Find a useful focus

Reflect on where you are, what matters and what you would like to change. Use your own priorities.

Make a manageable plan

Identify support, obstacles and small actions. Keep a Life Plan you can review and adjust.

Understand information you receive

Explain unfamiliar terms in documents from a clinician or pharmacy and prepare questions for the appropriate professional.

Return at your own pace

Pause, skip, revise or continue. Progress need not mean a streak, score or comparison with someone else.

- “Help me make a realistic plan for the next month, starting with one thing I can change.”

Learning with Pia >

Privacy and control >

DEVELOPMENT STATUS

Wellbeing assistance is in development and is intended for practical organisation and preparation. Medical diagnosis, treatment and medication changes belong with a qualified clinician.

PRODUCT PREVIEW

Buy for the job you need done

CHOOSE WITH MORE CONFIDENCE

Pia is being developed to help compare products, consider a seller's claims and check the practical fit with your life.

Explain the options

Bring a link, brochure, screenshot or model number. Compare useful features and trade-offs.

Check the fit

Look at compatibility with equipment you already own, setup requirements and the support you may need.

Understand the deal

Review the quoted price, inclusions, delivery and return terms. Check important details with the seller.

Keep the useful record

Save the chosen product details, instructions and receipt. Come back for setup help when it arrives.

- “Which of these televisions works with what I already have, and what would I really gain by spending more?”

Technology assistance > **Memory and records >** **Explore Pia Protect >**

DEVELOPMENT STATUS

Shopping assistance is in development. Check current prices and terms with the seller. You choose the retailer and approve purchases. Supported connections and charges will be explained before use.

PRODUCT PREVIEW

Understand. Practise. Respond.

FIND THE WORDS

A useful phrase becomes more useful when you understand when to use it, what it means and how to respond.

Learn for a situation

Prepare for travel, a workplace conversation, hospitality or a family occasion with relevant examples.

Practise with Pia

Rehearse short conversations and refine the words you want to say.

Understand more than the words

Explore meaning, tone and cultural context. Ask about ambiguity rather than assuming one perfect translation.

Choose how to communicate

Prepare text or use supported speech tools. Keep chosen phrases for another time.

- “Help me explain the problem politely, and show me what they might ask next.”

Japanese for travellers >

Learning with Pia >

DEVELOPMENT STATUS

Language support is in development. Supported languages and speech tools will depend on the released service. Use qualified interpreters for consequential medical or legal discussions.

PRODUCT PREVIEW

A familiar face at the table

PLAY WITH PIA

Pia is being developed to bring a familiar companion to play, with room for conversation and a pace that suits you.

Choose the experience

Pick from the supported games and set the tone for the session.

Learn as you play

Ask about the rules or practise without pretending that every move must be a test.

Keep play comfortable

Choose how much conversation you want. Stop or take a break when it suits you.

Stay in control

Game activity follows its own privacy and access boundaries. Playing does not authorise purchases or outside actions.

Everyday Pia >

Privacy and control >

DEVELOPMENT STATUS

Play with Pia is in development. Supported games and controls will be confirmed before release. Playing does not authorise purchases or actions outside the game.

PRODUCT PREVIEW

PIA Protect

A CLEAR SECOND LOOK BEFORE YOU ACT

An invoice arrives with changed payment details. Before paying, you want to understand the concern. PIA Protect is designed to explain warning signs and help you identify an independent way to verify the request.

Check something

Bring the material you choose to share. The intended assessment explains warning signs, supporting evidence, uncertainty and what would need independent verification.

Understand your security options

Understand appropriate account or device settings, permissions and official support options. Guidance is distinct from scanning or repairing a device.

Help me recover

If you have already acted, the design provides calm recovery guidance and relevant official routes. Essential help should not become a fear-driven sales opportunity.

DEVELOPMENT STATUS

PIA Protect is in development. It is designed to help you assess suspicious material and consider sensible next steps. It does not guarantee that a request is safe.

PRODUCT PREVIEW

Useful reasons and a next step

UNDERSTAND THE CONCERN. VERIFY THE REQUEST.

The proposed result explains what is known, what is uncertain and how to verify the situation through an independent route.

Understand the evidence

A familiar logo, phone number or convincing voice is not identity proof. An assessment should explain its reasoning rather than offer a misleading single safe score.

Choose what is shared

Use only the context you authorise. Sharing a summary with someone you trust is a separate choice, with the relevant review and consent.

Decide before acting

You choose what to share and what to do next. An assessment does not grant permission to send information, change an account or make a payment.

Next step: identify the question you need verified and use an independently obtained official contact route. PIA Protect does not promise to stop every scam, authenticate a bank, recover money or replace emergency services.

Read Meet PIA for the wider experience >

THE INTENDED EXPERIENCE

This brochure describes the intended customer experience. Available checks, supported connections and privacy controls will be explained with the released service.

PRODUCT PREVIEW

PACE

APPROPRIATE EFFORT FOR THE JOB

Why should formatting a note need the same effort as reconciling conflicting evidence? PACE is the PIA design for matching resources to the job while keeping the required quality and permissions.

Start with the outcome

Consider the task, its complexity, the consequence of an error and the evidence needed. Prompt length alone does not determine the required effort.

Preserve the required standard

Quality, privacy, safety and authority requirements come before cost optimisation. A cheaper route is suitable only when it meets the job's requirements.

Use effort where it helps

Reuse valid work, avoid unnecessary repetition and recognise when progress depends on an external input. More activity is not automatically a better result.

Keep cost understandable

The design uses bounded budgets, retries and escalation. Material changes to scope, provider conditions or cost require the applicable authority.

DEVELOPMENT STATUS

PACE is being developed to match computing effort to the task. These examples explain the approach; they are not performance benchmarks or savings guarantees.

PRODUCT PREVIEW

One Pia with proportionate support

SAME PIA. YOUR PERMISSIONS PRESERVED.

The customer should be able to explain the job without managing model sliders or choosing a different Pia personality.

A routine job

Formatting an existing note may call for a straightforward route and basic validation. Extra processing should have a reason.

A more involved job

Reconciling several sources may need deeper reasoning, explicit assumptions and stronger checks. The effort follows the actual work.

A consequential job

A privacy, permission or release decision retains its required controls. PACE cannot grant access, approve spending or override a hold.

When a route is insufficient

The design calls for bounded retry, a suitable authorised alternative or a truthful pause. It does not permit silent quality reduction or indefinite spending.

Next step: describe the result you need, the evidence that matters and any relevant deadline or cost limit. No saving percentage, speed multiplier or automatic discount is promised. Current charges belong in the separate approved schedule.

Read Meet PIA for the wider experience >

PRACTICAL HELP
CULTURAL UNDERSTANDING

Explore Japan with free guides on FumiTours.com. The Fumi AI companion is in development for more personal help with stations, menus and everyday questions.

RAILWAY & TRANSPORT

Use the free Rail Guide for tickets, transfers and station questions. Personal assistance with the information you share is part of the planned companion.

FOOD & MENUS

Explore the free Food Guide and useful Japanese. The planned companion would explain a menu you share and help you ask staff about ingredients and other details.

MORE OF JAPAN, IN CONTEXT

Discover free city guides, useful Japanese, shopping, karaoke and Onsen cultural material. Explore at your own pace on FumiTours.com.

FREE GUIDES. APP IN DEVELOPMENT.

The website is free to use. Check current app availability and terms. Confirm live travel and restaurant details; a recommendation is not a reservation.

MEET FUMI

PRACTICAL HELP AND CULTURAL UNDERSTANDING

Help with the next step in Japan.

Explore Japan now with free guides on FumiTours.com. Fumi is also developing an AI companion for stations, menus and everyday questions. This brochure introduces that intended experience.

Railway and transport

Understand a transfer, station information or the next step in a journey. Share the travel information you want explained and prepare for arrival.

Food and menus

Fumi helps you understand menus. Share the menu text or image you choose, then prepare a useful question for the staff.

More of Japan, in context

Explore useful Japanese, cultural context and practical travel questions in clear language. Planning and exploration remain part of the wider experience.

Fumi brings Japan travel and cultural discovery into the American AI portfolio. Start with the free website.

FREE GUIDES NOW. AI COMPANION IN DEVELOPMENT.

Explore free Japan guides at FumiTours.com. This brochure also previews the intended AI companion. Check current availability before relying on app features; a recommendation is not a reservation.

PRODUCT PREVIEW

At the table

FUMI HELPS YOU UNDERSTAND MENUS.

A translated word may leave you with another question.

The planned AI companion would explain the menu material you choose to share and help you prepare a useful question for restaurant staff.

1 Share what you choose

Provide the menu text or image you want explained. The service design also includes deliberately supplied speech; current supported inputs need confirmation.

2 Make sense of it

Ask for an explanation and help preparing a useful question. Spoken help and large translated text are part of the agreed communication design.

3 Confirm with the staff

Check live details directly with the restaurant. An explanation does not establish current ingredients, availability or a booking.

The same practical approach can help at a station: bring the information you have, clarify what it means and identify the next step to confirm.

ASK. UNDERSTAND. CONFIRM.

Menu explanation is planned AI assistance. Confirm ingredients, allergies, availability and other important details directly with restaurant staff. An explanation cannot guarantee that a dish is suitable.

PRODUCT PREVIEW

Your Japan journey

PRACTICAL HELP AND CULTURAL EXPLORATION

One Fumi, with different ways to help along the journey.

Railways

Explore the free Rail Guide for tickets, transfers, luggage and station questions. Confirm live service details with the operator.

Accommodation

Browse the free Hotels Guide for ideas and practical arrival context. Confirm prices and availability and book directly with your chosen provider.

Exploring

Use free city guides and self-guided journeys to find walks, outings and activities. Check current opening times, transport and entry requirements.

Food and menus

Browse food ideas and useful phrases on the website. Personal menu explanation is planned app assistance; confirm details with staff.

Useful Japanese

Practise with free Japanese lessons and useful travel phrases online. Live conversational help is part of the planned companion.

Culture and reflection

Explore Onsen cultural chapters and films on the website at your own pace. This prepared material does not require a live AI conversation.

YOUR JOURNEY, AT YOUR PACE

The public website offers self-guided travel and cultural material now. The companion is being developed to use selected trip context with your permission. Supported app functions will be explained at release.

PRODUCT PREVIEW

Begin with your situation

A RAIL TRANSFER. A MENU. A QUESTION.

Choose the help relevant to your journey.

Before relying on a feature, check what the current service supports. A prepared itinerary is not a ticket, and a recommendation is not a reservation.

Prepared cultural material

Read the free Onsen chapters and watch the films at your own pace. The prepared website material is separate from the optional AI companion.

Optional AI assistance

The AI companion is in development. Check available functions, prices and account terms before purchasing or using a released service.

Fumi and PIA Credits

The wider design aims to keep eligible unused service value useful across selected services. Customer naming, availability and redemption terms are still release decisions.

Clear commercial choices

The free Fumi Tours website takes no booking commissions. Make bookings with your chosen provider and check their prices, terms and conditions.

Start with a rail transfer, a menu or a question. Explore the free guides now, then check the current product information for the additional help offered by the developing AI companion.

Explore the wider PIA experience >

START WITH THE FREE WEBSITE

Visit FumiTours.com for guides and journey ideas. Check the current product information for the optional AI companion, supported inputs and connections, availability, prices and account terms.

PRODUCT PREVIEW

Your next step, explained

ARRIVE AND GET AROUND JAPAN

Fumi is being developed to help explain your next step in Japan. Explore practical travel guides today at Fumi Tours.

Make sense of the journey

Understand the route, transfer and ticket questions that matter for your next leg.

Prepare for the station

Think through luggage, walking time, entrances and what to ask staff. Check the actual departure information before boarding.

Ask a useful question

Prepare a clear, polite question in Japanese and understand the reply.

Keep the trip context

Use selected details such as destination, party and arrival plan so the explanation fits the journey.

- “We are at the airport with two bags. Explain the transfer to our hotel and what we should check at the station.”

Meet Fumi > **Explore Japan guides >** **Japanese for travellers >**

FUMI TOURS IS LIVE | AI COMPANION IN DEVELOPMENT

Explore free Japan guides at fumitours.com. The companion features described here are a product preview. Confirm live services, fares and departure information with the operator.

PRODUCT PREVIEW

Fumi helps you understand menus.

UNDERSTAND THE MENU

Go beyond the unfamiliar words. Explore what a dish means, how it is served and what you may want to ask before ordering.

Make sense of the choice

Share the menu you want help with. Ask about dishes, preparation and unfamiliar terms.

Ask the next question

Prepare a polite question about ingredients, portions or how to order. Confirm dietary requirements directly with staff.

Find a place that fits

Consider location, preferences and the occasion. Check current menus, opening hours and access with the restaurant.

Choose before booking

Check the restaurant's own reservation process and terms. A suggestion or translated message does not confirm a table.

- “What are these three dishes, and how can I ask whether this one contains peanuts?”

Explore the Food Guide >

Japanese for travellers >

FUMI TOURS IS LIVE | AI COMPANION IN DEVELOPMENT

Fumi Tours food guides are live. AI menu support is in development. For allergies, confirm ingredients and cross-contact risks with the restaurant; translation cannot guarantee safety.

PRODUCT PREVIEW

From a booking to a comfortable arrival

FEEL PREPARED FOR YOUR STAY

Understand the stay you have chosen, prepare the questions that matter and arrive with the practical details to hand.

Compare what matters

Consider location, room arrangement, access, transport and the experience you want.

Read the actual terms

Explain a confirmation, inclusions, check-in instructions and cancellation conditions. Ask about anything unclear.

Plan the arrival

Bring together the address, onward transport, luggage considerations and useful questions for your host.

Keep responsibility clear

Use the stated provider for a reservation, payment, change or refund. Confirm important requests directly with the property.

- “Our train arrives late. Help me understand check-in and prepare a message to the hotel.”

PRODUCT PREVIEW

A day that fits the way you travel

MAKE MORE OF JAPAN

Fumi is being developed to connect places with practical context. Explore Japan today with the free Fumi Tours guides.

Begin with your interests

Tell Fumi what you enjoy, how far you want to travel and what would make the day comfortable.

Put the day together

Consider travel, walking, timing, meal stops and alternatives without filling every minute.

Understand the setting

Learn why a place matters and how to visit respectfully. Local rules and current notices take priority.

Adjust as you go

Revisit the plan when the weather, energy level or opening hours change. Verify live conditions with the relevant source.

- “We have a free afternoon near the hotel and would like a quiet walk, something cultural and a good meal.”

Getting around Japan >

Explore the Food Guide >

Onsen and culture >

FUMI TOURS IS LIVE | AI COMPANION IN DEVELOPMENT

Explore free city guides and outings at fumitours.com. The AI companion features are in development. Check current opening hours, access and weather before setting out.

Say what you mean, politely

HAVE THE CONVERSATION

Fumi is being developed to help with Japanese conversations. Practise today with the free Fumi Tours lessons.

Prepare the situation

Explain what you need at a station, hotel, restaurant or shop. Start with the practical outcome.

Understand the phrase

See the meaning and relevant tone, then practise words you want to use.

Support the exchange

Use supported text or speech tools to help a conversation along. Ask for clarification when a reply is ambiguous.

Learn something to keep

Save selected useful phrases and return to them before the next conversation.

- “Help me ask whether we can leave our luggage, and show me the replies I might hear.”

PRODUCT PREVIEW

Give the job a clear home

PIA OFFICE

Messages, enquiries and follow-ups can scatter across a business. PIA Office is being developed to bring defined work, responsibilities and approvals into a shared environment.

One place to explain the outcome

Describe the business outcome. LIZ is designed to coordinate the shared Office relationship and keep the work in view.

Work that has a next step

Keep the purpose, responsible people, information, approvals and result together.

Your authority stays visible

Separate private intentions from shared business work. Decide who may view, prepare, approve, publish or spend.

- “Update our opening hours, prepare the customer notice and show me the website change before it goes live.”

Office for your business >

Websites with Office >

DEVELOPMENT STATUS

PIA Office is in development. The examples describe intended workflows, not a promise that every feature or connection is available. Discuss your requirements with American AI.

PRODUCT PREVIEW

Your website, in your own words

PIA OFFICE

PIA Office is intended to bring website creation into a conversation: describe what you want, review the draft and refine it.

Your information and identity

Bring your logo, approved colours, photographs and copy. The planned workflow keeps your identity and content choices visible.

Changes in ordinary language

Describe changes to wording, opening hours, images or supported pages. Review the revised draft before an authorised publication.

Enquiries that reach the business

Where offered, an optional assistant would use approved public information and pass enquiry details to the right private inbox.

Websites with Office >

Privacy and control >

DEVELOPMENT STATUS

Website creation through PIA Orbit is planned for Office. Features, connections and availability will be confirmed with the released service. Discuss specialist requirements before commissioning.

PRODUCT PREVIEW

A virtual team, one conversation

PIA OFFICE

You should not have to manage a relay of internal chats to get a job done. Return to the same work, see how it stands and make the decisions that need you.

A clear lead

LIZ is intended to coordinate Office work. Specialist AI roles support defined tasks; character presentation does not imply continuous human staffing.

Checks with a purpose

Review the exact result. Independent quality and assurance checks remain distinct from the work they examine.

Continuity you can use

Keep the current job and revision, pause within scope and return to the checkpoint. Honest status distinguishes a draft, a completed action and an unresolved problem.

Explore Pia Protect > **How PACE works >** **Office for your business >**

DEVELOPMENT STATUS

Office's virtual team is in development. Roles and checks are intended to support accountable work, not replace your authority. Agree scope, permissions, connections and terms before use.

PRODUCT PREVIEW

You should not have to remember everything

FOR THE OWNER-LED BUSINESS

When the owner is also the person answering questions, preparing work and chasing the next step, useful assistance starts with a manageable job.

Catch the enquiry

Prepare accurate public information and a clear route for an interested customer to leave the details needed for a reply.

Prepare the response

Organise the relevant information, draft the message and bring it back for the right approval.

Keep work visible

See what arrived, what is waiting and what has actually been done. Keep the follow-up connected to the original request.

- A local service business changes its hours. The website update, enquiry response and staff note stay part of one controlled job.

Explore Office >

Websites with Office >

DEVELOPMENT STATUS

Business assistance is in development. These examples describe the intended workflow. Start with one recurring process and agree the required outcome, access and approvals.

PRODUCT PREVIEW

Choose the amount of help that fits

FOR THE OWNER-LED BUSINESS

A straightforward website need should remain straightforward. Ongoing business operations need their own defined scope.

A clear public presence

Use supported website capabilities to explain your business and make contact information easy to find.

A connected enquiry route

Add approved public assistance and a private inbox where that capability is part of the agreed service.

Continuing Office work

Commission the business tasks, people and supported connections you actually need. Keep external costs, exclusions and approval rights clear.

Everyday Pia > **Explore Office >** **Privacy and control >**

DEVELOPMENT STATUS

Before commissioning, confirm available functions, supported connections, access, charges and exclusions with American AI. This brochure describes a product direction, not a service offer.

PRODUCT PREVIEW

Your business, clearly presented

YOUR WEBSITE WITH PIA

Describe the website you want, review a working draft and refine it with Pia. PIA Orbit is planned for Office and Premium.

Prepare the essentials

Begin with the pages your business needs: home, services, about, team, contact or enquiries. Confirm what the released service supports.

Make it recognisably yours

Add approved branding, photographs and copy. The public site need not look like PIA's own website or your private workspace.

Change it naturally

Describe changes to wording, colours, images, hours or supported pages. Review the exact draft before publication.

- "Use our new photograph, update Saturday's hours and show me the phone view."

Explore Office >

Office for your business >

DEVELOPMENT STATUS

Website creation through PIA Orbit is planned for Office and Premium. This preview illustrates the intended workflow. Confirm supported features and availability with American AI.

PRODUCT PREVIEW

A useful front door

YOUR WEBSITE WITH PIA

A website can collect an enquiry without pretending to run every part of the business.

Optional public assistance

Where offered, a public assistant would answer from approved business information and collect enquiry details with a clear summary.

A private place for follow-up

The planned enquiry workflow sends agreed details to a private business inbox, with access boundaries for staff, customer and financial records.

A controlled route online

Agree the hosting and domain route. Verify ownership, preserve existing email and plan any move from the current site before an authorised change.

Privacy and control >

Explore Office >

DEVELOPMENT STATUS

Public assistants, enquiry handling, domains and migration depend on the released service and agreed scope. Confirm included functions, exclusions and charges before commissioning.

PRODUCT PREVIEW

Bring your world into focus

PIA PREMIUM

Travel, family plans, creative projects and important records can scatter across different places. Premium is being developed as a private headquarters for selected parts of your world.

A useful personal briefing

See the plans, decisions and matters that need your attention without searching through every conversation.

Prepared for the next step

Bring together meeting material, travel details, correspondence and the information needed for a decision.

A continuing private relationship

Return to the same plans and chosen context. Keep the boundaries between personal matters, family, advisers and business clear.

- “Prepare my week: the family trip, the adviser meeting and the decisions I need to make before Friday.”

Explore Premium >

Privacy and control >

DEVELOPMENT STATUS

Premium is in development as a private coordination environment. These examples describe the intended experience, not a promise that every service or connection is available.

PRODUCT PREVIEW

Prepared around your priorities

PIA PREMIUM

The intended experience gives each job a clear lead and an accountable service, so you can review the work without managing internal handoffs.

Travel and hospitality

Prepare journey briefs, arrival details and preferences. Any provider connection or external action depends on availability and your authorisation.

Meetings and communications

Organise the purpose, participants, documents and follow-ups. Review important communications and external actions.

Records and continuity

Keep chosen records, decisions and versions together. Give an adviser only the material needed for a defined purpose.

Voice and dictation > **Memory and records >** **Ask the Boffins >**

DEVELOPMENT STATUS

Connected actions depend on released functions, provider support and your authority. Prepare and review first; a travel plan is not a booking, and a draft is not a sent message.

PRODUCT PREVIEW

Private does not mean isolated

PIA PREMIUM

Premium is being designed to connect chosen parts of your world while keeping each relationship's information and authority separate.

Personal choice

Decide what stays private, what may be remembered and what can be shared with a family member or adviser.

Business stays governed

The design separates private Premium records from separately commissioned Office work. Sharing requires an explicit, scoped decision.

A clear service agreement

Confirm the supported functions, responsibilities, providers and commercial terms. An AI-hosted experience is not a promise of constant human concierge staffing.

Explore Office >

Privacy and control >

How PACE works >

DEVELOPMENT STATUS

Confirm supported functions, information boundaries and commercial terms before use. Premium describes AI-assisted coordination, not continuous human concierge staffing.

PRODUCT PREVIEW

When the answer deserves a closer look

ASK THE BOFFINS

A claim sounds convincing. Two options look similar. A decision matters enough to investigate properly. Ask the Boffins starts by clarifying what you need to find out.

A focused research check

Examine a bounded question, claim, option or source and identify what the evidence can support.

A fuller research project

Agree a question, scope, sources, deliverable and limits. Bring findings, contradictions and practical implications into a coherent result.

Evidence you can inspect

See the sources behind important findings, the uncertainties and the difference between fact and interpretation.

- “Compare these approaches for our circumstances. Explain the trade-offs and what we still need to verify.”

Explore the portfolio >

Meet the Boffins >

DEVELOPMENT STATUS

Ask the Boffins is a standalone AI research platform in development. Contact American AI to discuss your question, scope, budget and the available route for the work.

PRODUCT PREVIEW

One project. One coherent result.

ASK THE BOFFINS

Ask the Boffins is American AI's independent research platform, designed around a clear brief, inspectable evidence and a useful report.

Agree before proceeding

Define the work and proposal before the research commitment. A visible invitation is not unlimited included research.

Keep different views connected

Test competing interpretations against the same project evidence. Track relevant changes rather than collecting disconnected answers.

Use the result thoughtfully

Review conclusions, limitations and recommendations. Professional decisions may still require a qualified adviser or primary verification.

Discuss a research enquiry >

Privacy and control >

SCOPE AND EVIDENCE

Agree the scope, deliverable and terms before starting. Research can reveal uncertainty or insufficient evidence. Professional decisions may still require qualified advice.

PRODUCT PREVIEW

Learning that starts with your situation

LEARN WITH PIA

Pia is being developed to explain subjects, practise with you and help you check understanding. Start with a skill you want to use.

Teach me

Begin with a clear objective and suitable source material. Ask for plain language, an example or another explanation.

Practise with me

Try a conversation, exercise or bounded workshop activity. Make a draft you can learn from.

Check I understand

Explore your reasoning, review a mistake and revisit the part that needs more work.

- “Help me prepare for this interview. Explain the question, practise with me and help me improve my answer.”

Learning with Pia >

Pia and her principles >

DEVELOPMENT STATUS

Learning support is in development. The examples describe intended assistance, not an accredited course or guaranteed result. Start with an objective and suitable source material.

PRODUCT PREVIEW

From practice to practical use

LEARN WITH PIA

PIA Learn is a planned shared capability for learning within everyday tasks. You keep the same Pia relationship as you practise.

Work and everyday technology

Practise communication and workplace skills, understand a document or become more confident with a supported tool.

Language and personal plans

Rehearse useful phrases or work through a manageable life-planning activity at your own pace.

A clear practice boundary

PIA Lab is the planned workshop within Learn. Practice does not send a message, spend money, operate a live account or certify a qualification.

Technology assistance > **Voice and dictation >** **Privacy and control >**

DEVELOPMENT STATUS

PIA Learn and its workshop activities remain in development. Practice does not authorise a real-world action or certify a qualification. Check any course or completion record against its published scope.

PRODUCT PREVIEW

Build around a useful outcome

PIA STRATEGIC PARTNER BRIEF

PIA is being developed for continuing personal assistance and business coordination. A partnership should improve a specific customer journey, with clear responsibilities and evidence.

A trusted route to help

Introduce the appropriate experience where people already need guidance: a device setup, a business enquiry, a journey or a complex decision.

A supported connection

Explore a defined data or service connection with clear responsibility, customer permission and a useful result.

A clear commercial relationship

Agree service, technology or distribution terms transparently. Disclose commercial relationships and keep customer recommendations free of hidden paid placement.

Explore the portfolio > **Explore Office >** **Ask the Boffins >**

PARTNERSHIP DISCUSSION

This brief invites a scoped partnership discussion. It does not announce an active partner, pilot or committed launch. Confirm current capability and the proposed responsibilities before proceeding.

PRODUCT PREVIEW

Make the working boundary explicit

PIA STRATEGIC PARTNER BRIEF

A credible partnership connects responsibilities as carefully as it connects systems.

Customer experience

Agree what the customer sees, how they start and who handles the next action or unresolved issue.

Content and information

Identify the approved sources, upkeep responsibility, coverage and process for corrections.

Actions and data

Define what information may pass, which actions are supported and where consent, confirmations and records sit.

Privacy and control >

Explore Pia Protect >

A DEFINED PILOT

Define a limited pilot with agreed measures, permissions, support and a stopping point. Product access, data use and external actions need their own agreed authority. No pilot is launched by this brochure.

PRODUCT PREVIEW

A partnership worth testing

PIA STRATEGIC PARTNER BRIEF

Start small enough to learn whether the proposed relationship is useful before expanding it.

What to demonstrate

A recognisable customer situation, the assistance offered, the provider handoff and the record of what happened.

What to measure

Proposed measures include completion, comprehension, repeated use, support burden and the cost of delivering the outcome.

What to agree

Coverage, responsibilities, data use, support, commercial terms, brand use and permission to distribute material belong in the agreement.

Company profile >

Explore Fumi >

A SCOPED AGREEMENT

Discuss scope, brand use, distribution, commercial terms and measurable outcomes with American AI. Exclusivity, fees, guarantees and launch dates require a specific agreement.

PRODUCT PREVIEW

A relationship beyond a single answer

AMERICAN AI / PIA INTRODUCTION

PIA's proposition is continuing practical assistance: organise, communicate, plan, create and carry authorised work forward. The ambition is a useful relationship across life and work.

A coherent customer portfolio

PIA for everyday assistance, Office for business work and Premium for private coordination address different contexts while keeping their permissions separate.

Reusable capabilities

Communication, capture, records, learning, research, protection and resource management support multiple customer journeys.

Customer control as product design

Permission, confirmation, correctable context and clear transaction boundaries form part of the experience, rather than an afterthought.

Explore the portfolio > **Explore Office >** **Explore Premium >**

PRODUCT AND COMPANY INTRODUCTION

This introduction outlines the American AI portfolio and PIA product direction. Capabilities have different development and release states; confirm the exact service and evidence relevant to your enquiry.

PRODUCT PREVIEW

From product breadth to a focused case

AMERICAN AI / PIA INTRODUCTION

A strong investment case needs more than a long feature list. It needs a useful product, repeatable delivery and evidence that customers return.

Focus the first use

Choose a small number of compelling journeys and demonstrate the whole experience, including follow-through.

Validate the economics

Measure service cost, support demand, paid use and retention. Confirm current commercial mechanics before projecting returns.

Establish the rights

Reconcile code, content, designs, combinations, licences and contributor agreements in the diligence process.

Technology portfolio >

How PACE works >

EVIDENCE FOR THE DISCUSSION

Use current evidence for product availability, customers, delivery costs and ownership. This brochure supplies no financial forecast, valuation or promise of investment returns.

PRODUCT PREVIEW

A strategic conversation

AMERICAN AI / PIA INTRODUCTION

American AI is the public brand, with American Artificial Intelligence Corp. as the adopted corporate presentation name. Current statutory records and executed documents govern the legal entity, asset title and transaction structure.

Potential contribution

A strategic backer could bring distribution, supported technology, operating capacity or capital. These are discussion themes, not committed resources.

Product and legal structure

Fumi is a Japan-focused part of the American AI product portfolio. Product, operating-company and licence arrangements should be checked in the relevant records.

Evidence before valuation

Revenue, customer traction, valuation and return forecasts require current verified evidence. Confirm ownership and transaction details against the diligence records.

Explore Fumi > **Technology portfolio >** **Partnership enquiries >**

START A CONVERSATION

For a partnership or investment enquiry, contact American AI to agree the diligence scope. This brochure is an introduction, not an offer of securities or a substitute for transaction documents.

PRODUCT PREVIEW

Japan assistance at a useful moment

FUMI / PIA JAPAN INTRODUCTION

A traveller reaches a station, opens a menu or prepares to check in. Fumi Tours provides useful guides now; the AI companion is being developed for more personal help with the next step.

A recognisable starting audience

Adults already in Japan who can use the English-led experience provide a focused initial introduction. Planning and cultural exploration remain further routes.

Practical breadth

Transport, stays, outings, dining, useful Japanese and prepared culture form one Japan-focused experience.

A clear product stance

Keep the traveller’s task central. Explain commercial relationships transparently; the free Fumi Tours website does not take booking commissions.

Getting around Japan > **Explore the Food Guide >** **Explore Fumi Tours >**

PUBLIC PLATFORM AND PRODUCT PREVIEW

Fumi Tours provides free Japan guides now. The personal AI companion is in development. This introduction describes the proposition; it does not announce a general app launch.

PRODUCT PREVIEW

A focused route to validation

FUMI / PIA JAPAN INTRODUCTION

A concentrated visitor proposition offers a way to test usefulness in real situations. Market success remains a hypothesis until measured.

Distribution fit

Potential conversations include hotels, transport organisations, tourism bodies, restaurants, airlines and travel platforms.

Customer evidence

Measure understanding, completed tasks, repeated use and willingness to purchase the relevant service. A polished prototype does not establish demand.

Operating evidence

Check service cost, support, data freshness, partner coverage and the responsibility for bookings, payments and complaints.

Partnership enquiries >

Credits: product direction >

A FOCUSED PILOT

Start with one audience and one useful journey. Agree measures, responsibilities and the service actually available before a pilot. Partnership interest alone does not establish a confirmed relationship.

PRODUCT PREVIEW

The Japan opportunity, clearly framed

FUMI / PIA JAPAN INTRODUCTION

Fumi is the Japan-focused offering in the American AI portfolio. Product ownership, the service operator and any partnership arrangement should be checked in the current supporting records.

A distinct Japan offering

Fumi belongs in the wider PIA product portfolio while maintaining its own visitor experience and commercial responsibilities.

A route into the wider relationship

The shared-credit design aims to retain eligible value across selected American AI services. Customer-facing availability and redemption terms remain release decisions.

A disciplined investment case

Build the commercial case from verified use, retention, acquisition costs and current terms. Confirm any partnership, revenue or valuation claim against current evidence.

Company profile >

Technology portfolio >

START A JAPAN DISCUSSION

Contact American AI about the Japan product, distribution or a strategic partnership. Confirm the operating entity, available service and commercial terms for the proposed arrangement.

PRODUCT PREVIEW

More than individual components

IP AND DEVELOPMENT PORTFOLIO

The development portfolio includes products, experiences, original content, policy designs, workflows and combinations of components. Its value must be assessed at the level of the work and the rights actually held.

Customer experiences

PIA personal assistance, Office, Premium, Fumi, research, learning, travel and creative experiences combine interfaces, methods and supporting records.

Reusable approaches

Permissioned actions, continuity, protection, resource management and source-based work connect capabilities into usable customer journeys.

Original development material

Specifications, code, visual assets, scripts, research, tests and documented design decisions form part of the evidence inventory.

Explore the portfolio > **How PACE works >** **Explore Pia Protect >**

EXPLORE THE DEVELOPMENT ESTATE

This overview introduces asset families and reusable work. Detailed specifications, source history, capability evidence and rights records belong in the scoped diligence material.

PRODUCT PREVIEW

Preserve the whole development story

IP AND DEVELOPMENT PORTFOLIO

Finished products are only one part of the record. Prototypes, experiments, paused work and retired approaches can contain useful knowledge and reusable assets.

Trace the work

Identify what each item is, its purpose, the saved sources, development stage and potential use.

Separate rights from inclusion

Inventory inclusion does not establish patentability, exclusivity, copyright ownership or freedom to operate.

Respect third-party inputs

Record dependencies, licences, provider terms and contributor rights. A developed combination may be valuable without owning each underlying component.

Ask the Boffins >

Partnership enquiries >

FOLLOW THE EVIDENCE

Select an asset family, then review its source trail, development stage, contributions and applicable rights. Inclusion here does not mean that every capability is released or available to license.

PRODUCT PREVIEW

One portfolio, clear rights

IP AND DEVELOPMENT PORTFOLIO

Shared technology can support different products and markets. A clear commercial record connects each product to its assets, rights, operator and proposed arrangement.

PIA / American AI

American AI is the short brand for the portfolio presented under American Artificial Intelligence Corp. The current owner position is that the relevant product/IP estate is company-owned, supported by records maintained for diligence.

Fumi and Japan

Fumi is a focused Japan product within the wider portfolio. Distinguish product/IP ownership from service operation, licences and each proposed partnership.

Diligence questions

Review title holders, assignments, licences, contributor rights and restrictions. Check the current operating entity and any proposed transfer against the actual records.

Company profile >

Explore Fumi >

A SCOPED COMMERCIAL DISCUSSION

Contact American AI to identify the products, assets and rights relevant to your enquiry. Ownership, licences, assignments and proposed transactions must be supported by their actual records.

PRODUCT PREVIEW

Fumi Partner Pack

A WARMER WELCOME TO JAPAN

Help your visitors discover more of Japan, with free guides, useful information and a practical connection to the Fumi network.

Start with the partner introduction | pages 2-3

Who the network is for, the first hotel programme and how to begin a conversation about useful material for your guests.

Meet Fumi | pages 4-7

An introduction to the free website and the intended AI companion experience, including menus, everyday questions and exploring Japan.

Read, share and start a conversation.

The following sections retain their own document codes and page numbers so you can also share them separately. Use the programme website for current details.

Explore the Fumi Partner Network >

FREE GUIDES NOW. AI COMPANION IN DEVELOPMENT.

The first hotel programme is complimentary and non-exclusive. Placement, image use and content features require suitable agreement and relevant approvals. No app account is needed to enquire.

PRODUCT PREVIEW

A warmer welcome, beyond reception

FUMI JAPAN PARTNER NETWORK

Introduce your visitors to free Japan guides, useful Japanese and local discoveries. The Fumi network welcomes conversations with businesses that help people enjoy Japan.

Hotels and ryokan

The first partner programme is complimentary and non-exclusive. Discuss guest brochures or a reception display, and share useful stories about your property.

Visitor-facing businesses

We also welcome enquiries from attractions, restaurants, tourism organisations, transport services and shops as the wider network develops.

Local stories that help

Propose photographs, seasonal news, events and practical tips for editorial review. Agree the use of your material; selection and audience reach are not guaranteed.

Explore the Fumi Partner Network >

FumiTours.com/partners/

A USEFUL PLACE TO START

The public guides are available now; the AI companion is in development. Fumi is operated commercially through Clear Fountain Pty Ltd (Australia). No app account is needed to enquire.

PRODUCT PREVIEW

Start with one useful connection

FUMI JAPAN PARTNER NETWORK

Tell us who you welcome, what visitors ask and how Fumi information could help. Begin with a small, practical arrangement that suits your business.

1. Introduce your organisation

Send your business name, location, website and a suitable contact. Tell us about your international visitors and the questions they commonly ask.

2. Choose a useful starting point

Hotels can discuss the complimentary pilot. Standard English guest brochures use one universal QR to FumiTours.com/go/; venue-specific printing is not required.

3. Agree how material will be used

Brochure placement, website listings, photographs and content features need a suitable agreement and relevant approvals. Confirm current information and permission to share it.

Send a partner enquiry >

FumiTours.com/partners/

YOUR NEXT STEP

Visit FumiTours.com/partners/ to review the programme and send an enquiry. Hotels are the first programme; other sectors can register interest as their programmes take shape.

MEET FUMI

PRACTICAL HELP AND CULTURAL UNDERSTANDING

Help with the next step in Japan.

Explore Japan now with free guides on FumiTours.com. Fumi is also developing an AI companion for stations, menus and everyday questions. This brochure introduces that intended experience.

Railway and transport

Understand a transfer, station information or the next step in a journey. Share the travel information you want explained and prepare for arrival.

Food and menus

Fumi helps you understand menus. Share the menu text or image you choose, then prepare a useful question for the staff.

More of Japan, in context

Explore useful Japanese, cultural context and practical travel questions in clear language. Planning and exploration remain part of the wider experience.

Fumi brings Japan travel and cultural discovery into the American AI portfolio. Start with the free website.

FREE GUIDES NOW. AI COMPANION IN DEVELOPMENT.

Explore free Japan guides at FumiTours.com. This brochure also previews the intended AI companion. Check current availability before relying on app features; a recommendation is not a reservation.

PRODUCT PREVIEW

At the table

FUMI HELPS YOU UNDERSTAND MENUS.

A translated word may leave you with another question.

The planned AI companion would explain the menu material you choose to share and help you prepare a useful question for restaurant staff.

1 Share what you choose

Provide the menu text or image you want explained. The service design also includes deliberately supplied speech; current supported inputs need confirmation.

2 Make sense of it

Ask for an explanation and help preparing a useful question. Spoken help and large translated text are part of the agreed communication design.

3 Confirm with the staff

Check live details directly with the restaurant. An explanation does not establish current ingredients, availability or a booking.

The same practical approach can help at a station: bring the information you have, clarify what it means and identify the next step to confirm.

ASK. UNDERSTAND. CONFIRM.

Menu explanation is planned AI assistance. Confirm ingredients, allergies, availability and other important details directly with restaurant staff. An explanation cannot guarantee that a dish is suitable.

PRODUCT PREVIEW

Your Japan journey

PRACTICAL HELP AND CULTURAL EXPLORATION

One Fumi, with different ways to help along the journey.

Railways

Explore the free Rail Guide for tickets, transfers, luggage and station questions. Confirm live service details with the operator.

Accommodation

Browse the free Hotels Guide for ideas and practical arrival context. Confirm prices and availability and book directly with your chosen provider.

Exploring

Use free city guides and self-guided journeys to find walks, outings and activities. Check current opening times, transport and entry requirements.

Food and menus

Browse food ideas and useful phrases on the website. Personal menu explanation is planned app assistance; confirm details with staff.

Useful Japanese

Practise with free Japanese lessons and useful travel phrases online. Live conversational help is part of the planned companion.

Culture and reflection

Explore Onsen cultural chapters and films on the website at your own pace. This prepared material does not require a live AI conversation.

YOUR JOURNEY, AT YOUR PACE

The public website offers self-guided travel and cultural material now. The companion is being developed to use selected trip context with your permission. Supported app functions will be explained at release.

PRODUCT PREVIEW

Begin with your situation

A RAIL TRANSFER. A MENU. A QUESTION.

Choose the help relevant to your journey.

Before relying on a feature, check what the current service supports. A prepared itinerary is not a ticket, and a recommendation is not a reservation.

Prepared cultural material

Read the free Onsen chapters and watch the films at your own pace. The prepared website material is separate from the optional AI companion.

Optional AI assistance

The AI companion is in development. Check available functions, prices and account terms before purchasing or using a released service.

Fumi and PIA Credits

The wider design aims to keep eligible unused service value useful across selected services. Customer naming, availability and redemption terms are still release decisions.

Clear commercial choices

The free Fumi Tours website takes no booking commissions. Make bookings with your chosen provider and check their prices, terms and conditions.

Start with a rail transfer, a menu or a question. Explore the free guides now, then check the current product information for the additional help offered by the developing AI companion.

Explore the wider PIA experience >

START WITH THE FREE WEBSITE

PRODUCT PREVIEW

Different safeguards, different jobs

PROTECTION ARCHITECTURE BRIEF

Helpful AI needs more than good intentions. The PIA architecture separates assistance, independent review, permission checks and recovery, with people retaining authority.

PIA Protect

PIA Protect is being developed to help assess suspicious messages, links and unusual requests, understand risks and consider a sensible next step.

AUDI - Independent Auditor

AUDI is designed to examine authority and evidence independently of the worker. Separate permission controls decide whether a protected action can proceed.

Permission checks and containment

The Safety Gateway is designed to check protected actions outside ordinary conversation. Containment can hold a risky route while safe explanation and planning continue.

Explore Pia Protect >

Privacy and control >

A PUBLIC ARCHITECTURE EXPLANATION

These layers describe the intended division of responsibilities. Check which controls are implemented and tested in the exact service you use. No model, auditor or safeguard guarantees safety.

PRODUCT PREVIEW

Incident response and accountability

PROTECTION ARCHITECTURE BRIEF

Recovery should preserve evidence and give people a clear route to act. A released service needs tested roles and recovery procedures.

Houston / Mission Control

The design coordinates incident roles, authority, evidence and recovery steps.

Recover with the record intact

Preserve the incident scope, customer impact, relevant decisions and the result of restoration checks.

Keep limits explicit

No guarantee of fraud prevention, perfect detection, uninterrupted service or universal recovery follows from a design document.

Continuity and evidence >

How PACE works >

EVIDENCE AND HUMAN CONTROL

For a technical or partner discussion, review the relevant release evidence and operating responsibilities. This overview does not establish a live incident-response service or a guarantee of recovery.

PRODUCT PREVIEW

The work should not disappear

CONTINUITY AND RELIABLE WORK

A reliable assistant should preserve the work, its permissions and a clear account of what happened. PIA continuity requirements address interruptions and uncertain outcomes.

Keep the checkpoint

Save the job, current version and progress so an interruption can be checked before work resumes.

Prevent duplicate consequences

If a result is uncertain, check what actually happened before repeating a message, booking or payment.

Keep status reachable

A service problem should leave a clear status and support route, including an honest account of any uncertainty.

Resume only authorised scope

Respect pauses, cancellations and the version actually approved. Reconsider permission if the action or its material details change.

Explore Office > **How PACE works >** **Protection architecture >**

DESIGN REQUIREMENTS TO BE TESTED

These are continuity requirements. Availability, recovery behaviour and protection against duplicate actions must be demonstrated for the relevant service. A design document is not a test result.

PRODUCT PREVIEW

Ideas worth developing

DEVELOPMENT HORIZONS

American AI develops shared capabilities that can support new products and useful forms of assistance. Research keeps the learning available while each idea earns its next step through evidence.

Reliability and continuity

Explore how ongoing work can survive interruptions, preserve its permissions and return a clear status to the customer. Reliable operation needs testing as well as design.

Useful connections

Research how selected devices, documents and services can support a task. A technical connection must not create new permission or put a language model in charge of safety-critical control.

New combinations

Shared work in assistance, research, learning and creation can support new experiences. An experiment remains an experiment until its usefulness and readiness are demonstrated.

Technology portfolio >

Continuity and evidence >

RESEARCH AND DEVELOPMENT

These are development directions, not a release schedule. A concept becomes a customer offer only when its scope, rights, availability and supporting evidence are established.

PRODUCT PREVIEW

Purpose, learning and creation

DEVELOPMENT HORIZONS

A useful programme starts with a human need. Learning, practical support and creative work need clear scope, consent and responsible delivery.

PIA Aid and Magic Bean

PIA Aid is the public-benefit programme. Magic Bean offers a welcoming route into practical AI help; local participation and support arrangements are discussed directly.

Capability and independence

PIA Pals explores deeper support such as learning, mentoring and suitable tools. Assistance should strengthen independence without requiring purchases or publicity.

Creative work with a clear source trail

Scripts, characters, visual assets and production experiments can support future work. Record their origins and rights, and distinguish released material from work still in development.

Creative possibilities >

Explore PIA Aid >

PURPOSE WITH PRACTICAL ARRANGEMENTS

PIA Aid information is public. Participation, local support and available resources require a direct discussion. This brochure does not enrol anyone or promise equipment, funding or a measured outcome.

PRODUCT PREVIEW

Keep the evidence, learn from the past

DEVELOPMENT HORIZONS

Paused and retired approaches can explain decisions, preserve useful methods and support future work without becoming current offers.

Preserve the development story

Keep source history, decisions and useful methods when a project changes direction. Use current product names and explain the status of earlier work accurately.

Make current status clear

A public explanation should say what exists, what is planned and what remains uncertain. A retired name, prototype or saved experiment is not a current customer entitlement.

Describe what the evidence supports

Assess work against its actual sources, rights and demonstrated results. Record unknowns openly and revisit claims when the product or its dependencies change.

Technology portfolio >

Talk to American AI >

ASK ABOUT THE CURRENT POSITION

Contact American AI about a particular capability or research direction. We can identify its current stage and the evidence relevant to your enquiry; retained work is not automatically a current offer.
