PRODUCT PREVIEW

Build around a useful outcome

PIA STRATEGIC PARTNER BRIEF

PIA is being developed for continuing personal assistance and business coordination. A partnership should improve a specific customer journey, with clear responsibilities and evidence.

A trusted route to help

Introduce the appropriate experience where people already need guidance: a device setup, a business enquiry, a journey or a complex decision.

A supported connection

Explore a defined data or service connection with clear responsibility, customer permission and a useful result.

A clear commercial relationship

Agree service, technology or distribution terms transparently. Disclose commercial relationships and keep customer recommendations free of hidden paid placement.

Explore the portfolio > **Explore Office >** **Ask the Boffins >**

PARTNERSHIP DISCUSSION

This brief invites a scoped partnership discussion. It does not announce an active partner, pilot or committed launch. Confirm current capability and the proposed responsibilities before proceeding.

PRODUCT PREVIEW

Make the working boundary explicit

PIA STRATEGIC PARTNER BRIEF

A credible partnership connects responsibilities as carefully as it connects systems.

Customer experience

Agree what the customer sees, how they start and who handles the next action or unresolved issue.

Content and information

Identify the approved sources, upkeep responsibility, coverage and process for corrections.

Actions and data

Define what information may pass, which actions are supported and where consent, confirmations and records sit.

Privacy and control >

Explore Pia Protect >

A DEFINED PILOT

Define a limited pilot with agreed measures, permissions, support and a stopping point. Product access, data use and external actions need their own agreed authority. No pilot is launched by this brochure.

PRODUCT PREVIEW

A partnership worth testing

PIA STRATEGIC PARTNER BRIEF

Start small enough to learn whether the proposed relationship is useful before expanding it.

What to demonstrate

A recognisable customer situation, the assistance offered, the provider handoff and the record of what happened.

What to measure

Proposed measures include completion, comprehension, repeated use, support burden and the cost of delivering the outcome.

What to agree

Coverage, responsibilities, data use, support, commercial terms, brand use and permission to distribute material belong in the agreement.

Company profile >

Explore Fumi >

A SCOPED AGREEMENT

Discuss scope, brand use, distribution, commercial terms and measurable outcomes with American AI. Exclusivity, fees, guarantees and launch dates require a specific agreement.

PRODUCT PREVIEW

A relationship beyond a single answer

AMERICAN AI / PIA INTRODUCTION

PIA's proposition is continuing practical assistance: organise, communicate, plan, create and carry authorised work forward. The ambition is a useful relationship across life and work.

A coherent customer portfolio

PIA for everyday assistance, Office for business work and Premium for private coordination address different contexts while keeping their permissions separate.

Reusable capabilities

Communication, capture, records, learning, research, protection and resource management support multiple customer journeys.

Customer control as product design

Permission, confirmation, correctable context and clear transaction boundaries form part of the experience, rather than an afterthought.

Explore the portfolio > **Explore Office >** **Explore Premium >**

PRODUCT AND COMPANY INTRODUCTION

This introduction outlines the American AI portfolio and PIA product direction. Capabilities have different development and release states; confirm the exact service and evidence relevant to your enquiry.

PRODUCT PREVIEW

From product breadth to a focused case

AMERICAN AI / PIA INTRODUCTION

A strong investment case needs more than a long feature list. It needs a useful product, repeatable delivery and evidence that customers return.

Focus the first use

Choose a small number of compelling journeys and demonstrate the whole experience, including follow-through.

Validate the economics

Measure service cost, support demand, paid use and retention. Confirm current commercial mechanics before projecting returns.

Establish the rights

Reconcile code, content, designs, combinations, licences and contributor agreements in the diligence process.

Technology portfolio >

How PACE works >

EVIDENCE FOR THE DISCUSSION

Use current evidence for product availability, customers, delivery costs and ownership. This brochure supplies no financial forecast, valuation or promise of investment returns.

PRODUCT PREVIEW

A strategic conversation

AMERICAN AI / PIA INTRODUCTION

American AI is the public brand, with American Artificial Intelligence Corp. as the adopted corporate presentation name. Current statutory records and executed documents govern the legal entity, asset title and transaction structure.

Potential contribution

A strategic backer could bring distribution, supported technology, operating capacity or capital. These are discussion themes, not committed resources.

Product and legal structure

Fumi is a Japan-focused part of the American AI product portfolio. Product, operating-company and licence arrangements should be checked in the relevant records.

Evidence before valuation

Revenue, customer traction, valuation and return forecasts require current verified evidence. Confirm ownership and transaction details against the diligence records.

Explore Fumi >

Technology portfolio >

Partnership enquiries >

START A CONVERSATION

For a partnership or investment enquiry, contact American AI to agree the diligence scope. This brochure is an introduction, not an offer of securities or a substitute for transaction documents.

PRODUCT PREVIEW

Japan assistance at a useful moment

FUMI / PIA JAPAN INTRODUCTION

A traveller reaches a station, opens a menu or prepares to check in. Fumi Tours provides useful guides now; the AI companion is being developed for more personal help with the next step.

A recognisable starting audience

Adults already in Japan who can use the English-led experience provide a focused initial introduction. Planning and cultural exploration remain further routes.

Practical breadth

Transport, stays, outings, dining, useful Japanese and prepared culture form one Japan-focused experience.

A clear product stance

Keep the traveller’s task central. Explain commercial relationships transparently; the free Fumi Tours website does not take booking commissions.

Getting around Japan > **Explore the Food Guide >** **Explore Fumi Tours >**

PUBLIC PLATFORM AND PRODUCT PREVIEW

Fumi Tours provides free Japan guides now. The personal AI companion is in development. This introduction describes the proposition; it does not announce a general app launch.

PRODUCT PREVIEW

A focused route to validation

FUMI / PIA JAPAN INTRODUCTION

A concentrated visitor proposition offers a way to test usefulness in real situations. Market success remains a hypothesis until measured.

Distribution fit

Potential conversations include hotels, transport organisations, tourism bodies, restaurants, airlines and travel platforms.

Customer evidence

Measure understanding, completed tasks, repeated use and willingness to purchase the relevant service. A polished prototype does not establish demand.

Operating evidence

Check service cost, support, data freshness, partner coverage and the responsibility for bookings, payments and complaints.

Partnership enquiries >

Credits: product direction >

A FOCUSED PILOT

Start with one audience and one useful journey. Agree measures, responsibilities and the service actually available before a pilot. Partnership interest alone does not establish a confirmed relationship.

PRODUCT PREVIEW

The Japan opportunity, clearly framed

FUMI / PIA JAPAN INTRODUCTION

Fumi is the Japan-focused offering in the American AI portfolio. Product ownership, the service operator and any partnership arrangement should be checked in the current supporting records.

A distinct Japan offering

Fumi belongs in the wider PIA product portfolio while maintaining its own visitor experience and commercial responsibilities.

A route into the wider relationship

The shared-credit design aims to retain eligible value across selected American AI services. Customer-facing availability and redemption terms remain release decisions.

A disciplined investment case

Build the commercial case from verified use, retention, acquisition costs and current terms. Confirm any partnership, revenue or valuation claim against current evidence.

Company profile >

Technology portfolio >

START A JAPAN DISCUSSION

Contact American AI about the Japan product, distribution or a strategic partnership. Confirm the operating entity, available service and commercial terms for the proposed arrangement.

PRODUCT PREVIEW

More than individual components

IP AND DEVELOPMENT PORTFOLIO

The development portfolio includes products, experiences, original content, policy designs, workflows and combinations of components. Its value must be assessed at the level of the work and the rights actually held.

Customer experiences

PIA personal assistance, Office, Premium, Fumi, research, learning, travel and creative experiences combine interfaces, methods and supporting records.

Reusable approaches

Permissioned actions, continuity, protection, resource management and source-based work connect capabilities into usable customer journeys.

Original development material

Specifications, code, visual assets, scripts, research, tests and documented design decisions form part of the evidence inventory.

Explore the portfolio > **How PACE works >** **Explore Pia Protect >**

EXPLORE THE DEVELOPMENT ESTATE

This overview introduces asset families and reusable work. Detailed specifications, source history, capability evidence and rights records belong in the scoped diligence material.

PRODUCT PREVIEW

Preserve the whole development story

IP AND DEVELOPMENT PORTFOLIO

Finished products are only one part of the record. Prototypes, experiments, paused work and retired approaches can contain useful knowledge and reusable assets.

Trace the work

Identify what each item is, its purpose, the saved sources, development stage and potential use.

Separate rights from inclusion

Inventory inclusion does not establish patentability, exclusivity, copyright ownership or freedom to operate.

Respect third-party inputs

Record dependencies, licences, provider terms and contributor rights. A developed combination may be valuable without owning each underlying component.

Ask the Boffins >

Partnership enquiries >

FOLLOW THE EVIDENCE

Select an asset family, then review its source trail, development stage, contributions and applicable rights. Inclusion here does not mean that every capability is released or available to license.

PRODUCT PREVIEW

One portfolio, clear rights

IP AND DEVELOPMENT PORTFOLIO

Shared technology can support different products and markets. A clear commercial record connects each product to its assets, rights, operator and proposed arrangement.

PIA / American AI

American AI is the short brand for the portfolio presented under American Artificial Intelligence Corp. The current owner position is that the relevant product/IP estate is company-owned, supported by records maintained for diligence.

Fumi and Japan

Fumi is a focused Japan product within the wider portfolio. Distinguish product/IP ownership from service operation, licences and each proposed partnership.

Diligence questions

Review title holders, assignments, licences, contributor rights and restrictions. Check the current operating entity and any proposed transfer against the actual records.

Company profile >

Explore Fumi >

A SCOPED COMMERCIAL DISCUSSION

Contact American AI to identify the products, assets and rights relevant to your enquiry. Ownership, licences, assignments and proposed transactions must be supported by their actual records.

PRODUCT PREVIEW

Fumi Partner Pack

A WARMER WELCOME TO JAPAN

Help your visitors discover more of Japan, with free guides, useful information and a practical connection to the Fumi network.

Start with the partner introduction | pages 2-3

Who the network is for, the first hotel programme and how to begin a conversation about useful material for your guests.

Meet Fumi | pages 4-7

An introduction to the free website and the intended AI companion experience, including menus, everyday questions and exploring Japan.

Read, share and start a conversation.

The following sections retain their own document codes and page numbers so you can also share them separately. Use the programme website for current details.

Explore the Fumi Partner Network >

FREE GUIDES NOW. AI COMPANION IN DEVELOPMENT.

The first hotel programme is complimentary and non-exclusive. Placement, image use and content features require suitable agreement and relevant approvals. No app account is needed to enquire.

PRODUCT PREVIEW

A warmer welcome, beyond reception

FUMI JAPAN PARTNER NETWORK

Introduce your visitors to free Japan guides, useful Japanese and local discoveries. The Fumi network welcomes conversations with businesses that help people enjoy Japan.

Hotels and ryokan

The first partner programme is complimentary and non-exclusive. Discuss guest brochures or a reception display, and share useful stories about your property.

Visitor-facing businesses

We also welcome enquiries from attractions, restaurants, tourism organisations, transport services and shops as the wider network develops.

Local stories that help

Propose photographs, seasonal news, events and practical tips for editorial review. Agree the use of your material; selection and audience reach are not guaranteed.

Explore the Fumi Partner Network >

FumiTours.com/partners/

A USEFUL PLACE TO START

The public guides are available now; the AI companion is in development. Fumi is operated commercially through Clear Fountain Pty Ltd (Australia). No app account is needed to enquire.

PRODUCT PREVIEW

Start with one useful connection

FUMI JAPAN PARTNER NETWORK

Tell us who you welcome, what visitors ask and how Fumi information could help. Begin with a small, practical arrangement that suits your business.

1. Introduce your organisation

Send your business name, location, website and a suitable contact. Tell us about your international visitors and the questions they commonly ask.

2. Choose a useful starting point

Hotels can discuss the complimentary pilot. Standard English guest brochures use one universal QR to FumiTours.com/go/; venue-specific printing is not required.

3. Agree how material will be used

Brochure placement, website listings, photographs and content features need a suitable agreement and relevant approvals. Confirm current information and permission to share it.

Send a partner enquiry >

FumiTours.com/partners/

YOUR NEXT STEP

Visit FumiTours.com/partners/ to review the programme and send an enquiry. Hotels are the first programme; other sectors can register interest as their programmes take shape.

MEET FUMI

PRACTICAL HELP AND CULTURAL UNDERSTANDING

Help with the next step in Japan.

Explore Japan now with free guides on FumiTours.com. Fumi is also developing an AI companion for stations, menus and everyday questions. This brochure introduces that intended experience.

Railway and transport

Understand a transfer, station information or the next step in a journey. Share the travel information you want explained and prepare for arrival.

Food and menus

Fumi helps you understand menus. Share the menu text or image you choose, then prepare a useful question for the staff.

More of Japan, in context

Explore useful Japanese, cultural context and practical travel questions in clear language. Planning and exploration remain part of the wider experience.

Fumi brings Japan travel and cultural discovery into the American AI portfolio. Start with the free website.

FREE GUIDES NOW. AI COMPANION IN DEVELOPMENT.

Explore free Japan guides at FumiTours.com. This brochure also previews the intended AI companion. Check current availability before relying on app features; a recommendation is not a reservation.

PRODUCT PREVIEW

At the table

FUMI HELPS YOU UNDERSTAND MENUS.

A translated word may leave you with another question.

The planned AI companion would explain the menu material you choose to share and help you prepare a useful question for restaurant staff.

1 Share what you choose

Provide the menu text or image you want explained. The service design also includes deliberately supplied speech; current supported inputs need confirmation.

2 Make sense of it

Ask for an explanation and help preparing a useful question. Spoken help and large translated text are part of the agreed communication design.

3 Confirm with the staff

Check live details directly with the restaurant. An explanation does not establish current ingredients, availability or a booking.

The same practical approach can help at a station: bring the information you have, clarify what it means and identify the next step to confirm.

ASK. UNDERSTAND. CONFIRM.

Menu explanation is planned AI assistance. Confirm ingredients, allergies, availability and other important details directly with restaurant staff. An explanation cannot guarantee that a dish is suitable.

PRODUCT PREVIEW

Your Japan journey

PRACTICAL HELP AND CULTURAL EXPLORATION

One Fumi, with different ways to help along the journey.

Railways

Explore the free Rail Guide for tickets, transfers, luggage and station questions. Confirm live service details with the operator.

Accommodation

Browse the free Hotels Guide for ideas and practical arrival context. Confirm prices and availability and book directly with your chosen provider.

Exploring

Use free city guides and self-guided journeys to find walks, outings and activities. Check current opening times, transport and entry requirements.

Food and menus

Browse food ideas and useful phrases on the website. Personal menu explanation is planned app assistance; confirm details with staff.

Useful Japanese

Practise with free Japanese lessons and useful travel phrases online. Live conversational help is part of the planned companion.

Culture and reflection

Explore Onsen cultural chapters and films on the website at your own pace. This prepared material does not require a live AI conversation.

YOUR JOURNEY, AT YOUR PACE

The public website offers self-guided travel and cultural material now. The companion is being developed to use selected trip context with your permission. Supported app functions will be explained at release.

PRODUCT PREVIEW

Begin with your situation

A RAIL TRANSFER. A MENU. A QUESTION.

Choose the help relevant to your journey.

Before relying on a feature, check what the current service supports. A prepared itinerary is not a ticket, and a recommendation is not a reservation.

Prepared cultural material

Read the free Onsen chapters and watch the films at your own pace. The prepared website material is separate from the optional AI companion.

Optional AI assistance

The AI companion is in development. Check available functions, prices and account terms before purchasing or using a released service.

Fumi and PIA Credits

The wider design aims to keep eligible unused service value useful across selected services. Customer naming, availability and redemption terms are still release decisions.

Clear commercial choices

The free Fumi Tours website takes no booking commissions. Make bookings with your chosen provider and check their prices, terms and conditions.

Start with a rail transfer, a menu or a question. Explore the free guides now, then check the current product information for the additional help offered by the developing AI companion.

Explore the wider PIA experience >

START WITH THE FREE WEBSITE

Visit FumiTours.com for guides and journey ideas. Check the current product information for the optional AI companion, supported inputs and connections, availability, prices and account terms.
